major multinational active in such diverse businesses as mechanical engineering, electronics, pharmaceuticals, finance, biotechnology, chemicals, luxury goods, food industry, public services, ecotechnology, software, transport, engineering, education, health, communications, FMCG, advertising, copyright, entertainment, publishing and sports.

It is certainly a privilege for our firm to receive a recognition of our work, and to receive the award for Sustained Excellence in Intellectual Property Law in Italy is a real honour. At the same time, it is an incentive to maintain our attention to details and to keep pursuing the client's interests.

De Simone & Partners offers a wide variety of services related to intellectual property, such as the filing and prosecution of patents, designs, trademarks and copyright. The competences of the firm also extend to custom protection, enforcement of IP rights before the courts and administrative bodies and drafting of licensing and distribution agreements.

We always put the client's interests first. We mainly work with large companies which have structured legal departments managing a large amount of information and cases. We always make a concerted effort to give the client the clearest frame and the best advice – trying to solve problems, rather than creating new ones.

We have a personalised approach. Each company has its history, structure and goals. When a new client arrives, we first try to understand him or her, before turning our attention to the legal issues.

Lawyers Choice Award: Insurance Broker of the Year – Germany

Dr. Ihlas GmbH

Dr. Ihlas GmbH is an insurance broker specialising in financial lines, with clients belonging to the top companies and financial institutions.

We provide services for risk managers, in-house brokers, procurement and in-house counsels. We develop and improve wordings as a Wholesale Broker.

It feels so great to have been named Insurance Broker of the Year again. We could get used to it! But we have only a short moment left to celebrate. The summer holidays are quite near and the market is trying hard to get everything done in advance of the World Cup.

Awards create happiness. They empower to overcome the next challenge, which is already waiting just around the corner. Within our network we may distinguish ourselves clearly.

As a niche player we have specialised in financial lines only, especially directors & officers, representations & warranties, employment practices, fiduciary and commercial crime. The campaign for Cyber gets stronger each year but only few buyers come.

Dr. Ihlas GmbH is linked to a passion for research. We share and publish regularly. That is unusual in a broker market where every-

one claims to have the "top secret best terms and conditions." We have service and quality targets prior to sales. The world wants to be deceived and our job starts sometimes with delivering sobering facts.

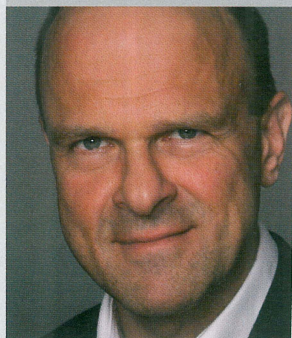

Insurance brokers and risk managers are our clients. They look for our expertise where they need non-standard services and products.

Our brand is based on recommendations and qualifications. They can be viewed at: www.dr-ihlas.com/en/references.html.

Over the past 12 months, the market has continued to soften, the capacity is cheap and the growing financial lines business is shopper's paradise.
